## SUMMARY

Having Two years of hands-on experience in React development, I am passionate about creating dynamic and user-friendly web applications. I have strong Understanding in React Hooks and Redux. Proficient in front-end development, I excel at building responsive interfaces and optimizing application performance. Currently working as a Software Engineer at Grasko Solution.

## PROFESSIONAL SYNOPSIS

### Front-End Development Expertise:

- Extensive experience in crafting dynamic and responsive user interfaces using React.
- Proficient in developing and maintaining scalable web applications through React's component-based architecture.
- Adept at state management, routing, and integrating APIs to ensure seamless and efficient user experiences.
- Hands-on experience in optimizing performance and addressing cross-browser compatibility issues.
- In-depth understanding of JavaScript, the programming language that enables dynamic and interactive web pages.
- Familiarity with front-end frameworks like Material UI for rapid development.
- Understanding of UX principles to create interfaces that are intuitive and user-friendly.
- State management using tools like React Context or Redux.

## PROFESSIONAL EXPERIENCE

### Software Developer (UI)

Grasko Solution, Bangalore

**September 2021- Present**

(Having 2+ year of experience as a Software Developer)

## ROLES AND RESPONSIBILITIES:

- Design and develop modular, reusable components using React.
- Manage the state of the application using React's state and props systems. Understand and implement stateful and stateless components appropriately.
- Integrate front-end components with back-end services and APIs. Fetch and send data efficiently using tools like the Fetch API or third-party libraries.
- Utilize Material-UI's theming system to customize the look and feel of our application. Adjust color schemes, typography, and other styling aspects to align with your design requirements.
- Use Material-UI's Dialog and Modal components to create pop-up dialogs and modals for user interactions.
- Build and maintain the client-side of web applications, ensuring the responsiveness, performance, and usability of the application.
- Collaborate with UX (User Experience) designers and manager to implement visually appealing and intuitive user interfaces. Translate design mock-ups and wireframes into working code.

- Developing responsive UI/UX interface
- Ensure that web applications work consistently across various browsers and devices. Test and debug issues related to different browsers and versions.
- Monitoring application performance and implementing improvements to enhance overall user experience.
- Participate in code reviews to maintain code quality, share knowledge, and ensure adherence to coding standards.
- Conducting periodic code refactoring to improve maintainability, readability, and scalability.
- Creating front-end libraries and reusable code files for the company's future products.

## TECHNICAL SKILLS

- HTML5 , CSS3 and JavaScript (ES6+)
- React JS, Redux
- RESTful APIs, Responsive Design
- Jira , Postman, Git, API Integration, NPM, Bitbucket

## ACADEMIC BACKGROUND

- B.Tech in [Computer Science] | AKTU LUCKNOW | 2017-2020 | Percentage: 69.9%
- DIPLOMA ENGINEERING | UPBTE LUCKNOW | 2015-2017 | Percentage: 69.8%
- Senior Secondary (Class-XII) | UP BOARD | 2013-2015 | Percentage: 75.4%
- High School (Class-X) | UP BOARD | 2012-2013 | Percentage: 77.3%
